### LETTER OF SUBMITTAL

House of Representatives, Committee on Appropriations, Washington, DC, May 23, 1996.

Hon. Newt Gingrich, The Speaker, U.S. House of Representatives, Washington, DC.

DEAR MR. SPEAKER: By direction of the Committee on Appropriations, I submit herewith the Committee's report on the subdivision of budget authority and outlays. This report is consistent with the "Allocation of Spending Responsibility to House Committees Pursuant to Section 602(a) of the Congressional Budget Act—Fiscal Year 1997" beginning on page 158 of House Report 104–575 to accompany H. Con. Res. 178, setting forth the Congressional Budget for the United States Government for the fiscal years 1997, 1998, 1999, 2000, 2001, and 2002 as adopted by the House on May 16, 1996. The authority for this allocation, which is based on the House passed budget resolution, is section 3 of H. Res. 435. This section makes the subdivision of this allocation effective for all purposes of the Congressional Budget Act of 1974.

The Committee on Appropriations has been allocated \$494.995 billion in discretionary budget authority and \$535.139 billion in outlays. The Committee, in distributing this among the 13 regular committees hills had remained within the allocation.

appropriations bills, has remained within the allocation.

Sincerely,

Bob Livingston, Chairman.

### DISSENTING VIEWS OF HON. DAVE OBEY

The allocation presented for the Committee's approval today is "a day late and more than a dollar short." Unless it is substantially modified, it will get us right back into the highly divisive and contentious process of vetoes and threatened government shutdowns that I hoped was put behind us when we finally passed the FY

1996 Omnibus Appropriations Act just last month.

We are already well behind our schedule for this year. Under the law, the Appropriations Committee should have had a budget allocation based on the FY 1997 Budget Resolution Conference Agreement by April 15th. But, for the second year in a row, the Budget Resolution is far behind schedule. As of this morning, it is still pending in the Senate with the clear prospect that further significant changes to the level of discretionary spending will be adopted.

The time of this Committee might be better used today by passing a resolution imploring the House leadership to take steps to ensure that the Budget Committee meet its obligations under the

schedule specified by law.

Concerning the substance of the Chairman's 602(b) proposal, I sincerely regret that our Committee is not continuing the spirit of bipartisan cooperation that we enjoyed with the passage of the FY 1996 Omnibus Appropriations Act just last month. Unfortunately, because this allocation so closely tracks the unrealistic and ideological stance recommended by the House Budget Committee, we are once again faced with a wholly unrealistic level of discretionary funding for the priorities we face here at home.

There has been a great deal of confusion in the press about what the 1997 House Budget Resolution did and further confusion about what the Chairman's proposed 1997 602(d) allocation would or

would not do. This deserves greater clarity.

We had a very difficult time last year. Most of the domestic budget was not agreed to until most of the fiscal year was over. Getting agreement between the House, the Senate, and the White House was an enormously difficult task—one which the chairman document and it for

deserves great credit for.

That hard-won agreement could provide us with a very useful benchmark to build on and could help prevent this year from becoming the quagmire that we fell into last. The question that I think we should ask when we look at this allocation is "Will it permit that bipartisan compromise to go forward past the last 5 months of fiscal 1996, or are we back in the middle of the same old argument for fiscal year 1997?"

Although the Republican allocation is advertised in some circles as a freeze of 1996 levels, the bottom line is that \$6 billion in one-time offsets that made the Fiscal 1996 agreement possible have been left out of the FY 1997 House Republican plan. The Budget Committee has prohibited the Appropriations Committee from re-

peating these offsets in FY 1997, but has not made up the difference in higher allocation to the Appropriations Committee.

Several billions more in other normal accounting adjustments

also have been left out.

The bottom line is that we are working with an allocation that is about \$8 to \$9 billion short of what is needed for a hard freeze of domestic programs, and is about \$14 or \$15 billion short of funding the same level of services agreed to in the FY 1996 compromise.

Make no mistake about it, the levels in the plan adopted today are still far below 1996 levels. If these key domestic subcommittees are ultimately forced to produce bills with these levels, these bills will have great difficulty passing the House, will be unacceptable in the Senate, and will never be signed into law.

Here are some specifics.

Unless the allocation is amended, the Labor-HHS-Education allocation will be \$2.9 billion below the hard freeze level. And a hard freeze would mean decreased enrollment in Headstart, very serious disruptions in the research program at NIH, and laying off more than a thousand employees in the Social Security Administration.

Unless the allocation is amended, the Agriculture Subcommittee will be about \$1.5 billion short of a hard freeze under the Livingston allocation. We are going to see very deep cuts in the WIC program. We are going to see programs like rural water and sewer absolutely clobbered.

Unless the allocation is amended, the Commerce-Justice-State-Judiciary bill is not going to have the money to staff the new prisons that are being completed.

Unless the allocation is amended, the domestic programs in Energy and Water Subcommittee will be about \$1.3 billion below a hard freeze. That will mean serious cutbacks in flood protection

programs among other priorities.

Unless the allocation is amended, the Interior Subcommittee will be more than a billion dollars below a hard freeze. That means that some of my friends on the other side of the aisle will finally get their shot at energy research, but it will probably also mean significant cuts in the Park Service and in the National Forests.

Unless the allocation is amended, the VA-HUD Subcommittee will be in a similar position. We will see some unpleasant choices involving veterans hospitals, the Space program and environmental

protection.

Unless the allocation is amended, the Transportation bill is going to pose a choice between eliminating Air Traffic Control and Air Safety positions at the FAA or cutting the spending authority for highway construction below last year's level. I would submit that both of these activities are vital to the safety of our citizens and the health of our economy and are worth the investment.

Unless the allocation is amended, the Treasury-Postal Service Subcommittee allocation will simply not permit the new measures planned for federal buildings to go forward without making very deep cuts in other areas. We will probably see layoffs in IRS staffing and that will mean lower rates of collection on delinquent taxes and a net increase in the deficit. That is a stupid choice, but one

this allocation almost ensures.

The alternative offered by Committee Democrats was based on the discretionary spending alternative to the House Budget Resolution proposed by the Conservative Coalition Democrats. It fully conformed to the discretionary spending levels called for in the FY 1997 House Budget Resolution and doesn't spend one dime more than the plan which the Committee adopted.

It would reallocate the resources available in a much more equitable and sensible manner. For the same amount of money, this

Democratic proposal:

—is better for education;

- —is better for the environment;
- —is better for veterans;
- —is better for rural America;
- —is better for our National Parks;

—is better for highway construction and air safety;

and is better for a host of other important priorities of the American People.

To pay for these priorities, our plan would scale back the \$12.8 billion increase in military spending over the Pentagon's request by \$8.8 billion, leaving a military spending level still will above the Pentagon's request. This \$8.8 billion in budget authority (and \$3.2 billion in outlays) would be redistributed to the domestic subcommittees to help fill shortfalls in critical, common-sense, national priorities that Americans expect us to take care of.

Even after this redistribution, we would still have big gaps. This will not get us all the way back to a hard freeze and there still would be about \$4 billion less in Domestic Spending than the Conservative Coalition called for. We will be short, particularly on the

outlay side with virtually every subcommittee.

While not perfect, our proposed reallocation reflects the common sense priorities of American families who support education, the environment, roads and bridges, health research, National Parks, clean water, and a host of other domestic programs. Our plan would continue the compromise we thought we reached last month to call off the assault on these programs. We believe our plan is far preferable to the wildly unrealistic proposal being offered by the chairman.

DAVE OBEY, Ranking Democratic Member.

A letter sent to the Committee by the Office of Management and Budget made the following assessment of how the allocations which were adopted could be expected to affect programs within the jurisdiction of each of the following subcommittees:

Labor-HHS-Education: The allocation is about \$6.7 billion below the President's request, and \$2.5 billion below the levels needed to sustain the 1996 program level. It could mean major cuts below 1996 in such priorities as Title I-Education for the Disadvantaged, Pell Grants college scholarships, and the Summer Youth

Employment program.

VA-HUD-Independent Agencies: The allocation would jeopardize our efforts to protect public health and the environment by maintaining environmental enforcement by the EPA; meeting our international commitments to cut greenhouse gas emissions; and spurring new technologies to protect public health, reduce costs, and create new jobs. It also would not provide increases for new Drinking Water State Revolving Funds, fully fund the Clear Water Act State Revolving Funds, or fund the President's initiative to stimulate the development of "Brownfield" sites in distressed communities.

Commerce-Justice-State: The allocation would force two harsh options—(1) drastically cut the President's anti-crime requests, or (2) cut deeply into critical technology and assessed contributions to international organizations. In jeopardy are the crime programs to put 100,000 more police on the street and beef up FBI criminal investigations and law enforcement technology improvements, DEA drug enforcement, U.S. Attorneys' prosecutorial efforts, prisoner incarceration, and border control. To protect those, the Subcommittee would have to slash high technology, such as the Advanced Technology Program and Manufacturing Extension Partnerships, planning for the decennial census, and Weather Service modernization. Finally, the allocation threatens the nation's assessed contributions to international organizations, especially the United Nations.

Interior: The allocation jeopardizes the President's requests for the Pacific Northwest Forest Plan, the Everglades Restoration initiative, and other key programs in regions with important needs. It threatens to underfund our parks and public lands. And it also could devastate such Presidential initiatives that promote energy conservation as the Partnership for a New Generation of Vehicles and the Climate Change Action Plan. For Native Americans, the allocation threatens key programs in elementary and secondary education for Indian children, law enforcement and public safety, road maintenance, foster care and other child welfare programs, general assistance to needy families, and higher education scholarships

Foreign Operations: The allocation, \$1 billion below the President's request and \$350 million below the 1996 level, would threaten America's international leadership in critical bilateral and multilateral activities. In particular, it likely would mean deep cuts in U.S. contributions to multilateral banks, severely undermining the achievement of important U.S. security and economic objectives through those institutions and diminishing other nations' willing-

ness to cooperate internationally with us.

Agriculture: The allocation would mean an 11 percent cut from the constrained levels of 1996, leading to severe and imprudent cuts in high-priority programs, such as the Women, Infants, and Children (WIC) program; any cut from the President's request would preclude achieving full participation in WIC. In addition, an 11 percent cut in water and wastewater grants would translate into just \$325 million in assistance to the lowest-income rural communities—45 percent below the President's request.

Energy and Water: The allocation would mean a \$1.5 billion cut in non-defense programs in the Energy Department, Army Corps of Engineers, and other agencies. The likely result: deep cuts in solar and renewables research, and undesirable cuts in university, biological, and basic physics research. A major cut in fusion research will force the shutdown of major research facilities and U.S. withdrawal from international fusion research projects, thereby threatening other U.S.-led international science projects.

Treasury-Postal: At \$1.9 billion below the President's request, the allocation likely would mean significant cuts for the Internal Revenue Service and, in particular, the Tax Systems Modernization program—a crucial effort to bring the IRS' paperbound processes into the electronic age and greatly improve the productivity of its workforce.

Transportation: The allocation would jeopardize the President's requests for transportation safety programs. In particular, the requests for FAA operations and FAA capital acquisition programs

are designed to enhance aviation safety.

District of Columbia: The allocation does not accommodate the President's request for a modest \$52 million increase in the Federal payment to the District of Columbia pension system—a necessary step to fulfill the Federal Government's responsibility for part of its pension liability and help the District get its financial house in order.

Defense: While the President's budget fully funds our nation's defense needs, the nearly \$12 billion that this allocation alone would add is unnecessary and will not contribute materially to the currently high levels of military readiness. Rather than spend money on programs that we do not need now, the President's budget provides more funds for modernization at the turn of the century—when the most advanced next generation of defense technologies is ready for production.

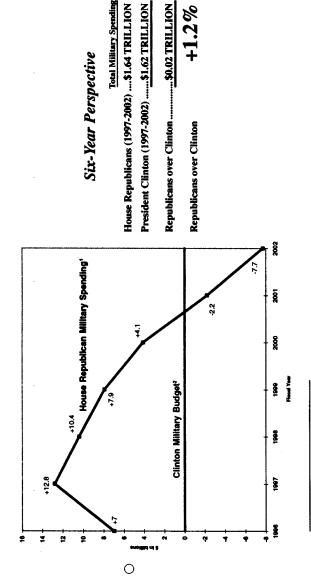

Military Construction: The allocation, \$900 million above the President's request, supports many projects that are not needed

and are not in the Defense Department's out-year plan.
